

# FemmeFactor

Progesterone is involved in many facets of female health throughout her life. It plays a critical role in preparing the Uterus for pregnancy, it keeps the bones strong, helps to prevent Cystic Breasts and Ovaries, and helps to prevent Cancer of the Breast and Ovaries due to excessive Estrogen dominance. By using a Progesterone cream, together with the supportive nutrients found in our exclusive menopause formula, (see Meno Eze) thousands of women no longer suffer the often debilitating symptoms and side effects of the Menopause, caused by Estrogen Dominance and Hormone Imbalance.

Realizing that much of the Progesterone applied topically never reaches the sub-dermal levels, where it may be absorbed into the system, we have developed a unique delivery system, which has increased the amount of absorbable Progesterone by as much as 40 percent. This delivery system has been able to increase the levels of Progesterone in the system, thereby bringing greater relief to thousands of women, without the need for excessive and expensive additional doses of the formula.

**FemmeFactor:** Progesterone is a vitally important hormone throughout a woman's life. During childbearing years, many women are deficient in this hormone and develop PMS type symptoms as a result. Pre-menopause and Menopause aged women frequently find themselves in a situation of Estrogen dominance, leading to a variety of symptoms and side effects. The leading researcher in the field of menopause and hormone imbalance, Dr. John Lee, recommends that many women, after the age of 45 or 50, should consider using a cream containing Progesterone, to enhance and balance these delicate hormones. Our formulation contains special ingredients to ensure rapid and total absorption of the Progesterone into the skin.

**Container Size: 2 ounces**

**Active Ingredients: Progesterone (USP) 500 mg per ounce.**

*Other Ingredients: Vitamin E, DMSO, lecithin, purified water.*

**Directions:**

**For best results, it is a good idea to rotate the area where you apply this cream. Doing so will enhance absorption and ensure that the receptors do not become overloaded.**

**Suggested applications:**

**Use ½ teaspoonful per day as follows:**

**Day 1: Apply to inside of left upper arm**

**Day 2: Apply to left side of body from armpit to waist area**

**Day 3: Apply on torso front on abdomen beneath the navel**

**Day 4: Apply on left inner thigh**

**Day 5: Apply on right inner thigh**

**Day 6: Apply on right side of body from armpit to waist area**

**Day 7: Apply to inside of right upper arm.**

**Repeat this cycle three consecutive weeks each month or as directed by your health care practitioner.**

For best results, we suggest using this product in conjunction with a Full Spectrum liquid nutritional program.
